Neumorphism Calculator with HTML and CSS

Andreea Draghici

April 2021

1 Task:

**Make a neumorphism calculator using html and css.**

Figure 1: The appearance of the neumorphism calculator

This neumorphism calculator performs a simple arithmetic operations, such as addition, difference, multiplication, division.
**We also find an option to check if a number is smaller than another number.**
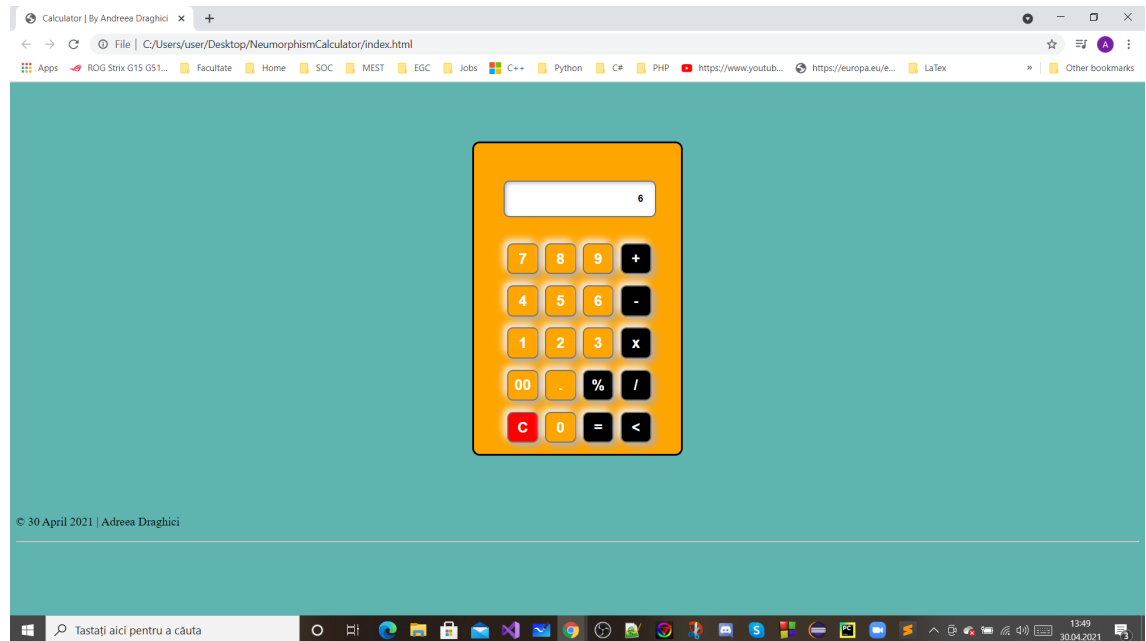

Figure 2: Multiplication operation

Figure 3: Result of multiplication operation

This is a mini project for personal development accumulating basic notions in css and html.

I used the introductory notions from the w3schools site, both for css and html.
